Education

VNU-HCM University of Science (HCMUS)

Computer Science Student

HCMC, Vietnam

Expected 2026

- Honors Program
- GPA: 3.3

Technical Experience

Golden Owl Solution — Fullstack JS Intern

Applicant Tracking System (ATS)

HCMC, Vietnam

Feb 2026 - May 2026

- *Tech stack:* TypeScript, React.js, TanStack, NestJS, JWT, OAuth, AWS, PostgreSQL
- Contributed to end-to-end development of a web-based Applicant Tracking System (ATS), collaborating across frontend and backend layers
- Designed and implemented a scalable PostgreSQL database following OOP and relational design principles
- Developed and secured RESTful APIs using Node.js, implementing JWT & OAuth-based authentication and role-based access control (RBAC)
- Documented APIs with Swagger to improve maintainability and team collaboration
- Built and optimized RAG pipeline for resume parsing and candidate evaluation using LLM integration
- Deployed application manually on AWS, and monitored system performance and errors using Sentry

Social Fanpage Chatbot

Feb 2026 - May 2026

- *TypeScript, NestJS, TypeORM, PostgreSQL, Redis, Socket.IO, AWS S3, Cloudinary, Swagger*
- Built a multi-platform chatbot integrating Meta (Facebook/Instagram) and Telegram for real-time messaging
- Developed webhook-based message routing with secure payload handling and channel-specific responses
- Built a RAG pipeline using Gemini embeddings and pgvector, enabling semantic search over uploaded documents with async processing via BullMQ
- Optimized pipeline using two-tier retrieval and parallel embedding, reducing LLM usage and improving precision for domain-specific queries

Shub Solution - Frontend Developer Intern

Tech stack: Next.js, Vite, React, TypeScript, Material-UI/TailwindCSS, Fetch API, JWT

HCMC, Vietnam

Aug 2025 - Dec 2025

- Participated in developing CRM system with API endpoint integration and advanced UI/UX features.
- Implemented centralized state management using React Context API.
- Independently developed two mobile-first responsive web applications.
- Optimized bundle size and load time using Webpack through code-splitting, tree-shaking, and asset optimization.
- Optimized SEO with next-sitemap and implemented SSR with SWR for efficient data fetching.

Saigon Solutions SGS — Frontend Developer Intern

Tech stack: ReactJS, JavaScript, Vite, TailwindCss, Express, Docker, i18next

HCMC, Vietnam

May 2025 - July 2025

- Developed responsive landing page with modern UX design using React, Framer Motion and client-side routing.
- Built Express.js proxy server to securely forward contact form data to Google Apps Script webhook.
- Implemented CORS-enabled API architecture to handle cross-origin requests between frontend and backend services.

Technical Skills

- Languages: **JavaScript, TypeScript, SQL, Python, C/C++**
- Backend & APIs: **Express, Node.js, NestJS, TypeORM, MikroORM**
- FrontEnd: **React.js, Vite, Tailwind, Next.js, Tanstack query, Zustand**
- API & Tools: **REST API, JWT, OpenAPI/Swagger, Axios, Zod**
- Databases: **MySQL, PostgreSQL, Redis**
- DevOps & Deployment: **Docker, Docker Compose, AWS, Sentry**
- Testing & Tools: **Jest, Postman**
- Version Control: **Git**

Awards

- Vietnam National Informatics Olympiad (2022): **Honorable Mention**
- Provincial Informatics Olympiad (2022): **1st Prize**
- 30/4 Informatics Olympiad (2021): **Gold Medal**
